

Cloud Computing Capstone Certification

About this capstone

The **Cloud Computing** capstone is a comprehensive certification awarded upon successful completion of the following required exams. This structure validates a learner's knowledge of cloud technologies, services, and industry-relevant applications—preparing them for roles in cloud infrastructure, computing, and digital transformation.

Required certifications

- [Cloud Computing 1](#)
- [Cloud Computing 2](#)

Capstone description

The Cloud Computing capstone assesses learners' understanding of core principles and real-world implementations of cloud technology. Cloud Computing 1 covers best practices in cloud usage, the structure of global infrastructure, and fosters innovation through case-based learning. Building on that foundation, Cloud Computing 2 explores advanced topics such as programming in cloud environments, networking, cybersecurity, data storage solutions, and cross-industry applications—equipping learners with a broad and practical skillset for modern cloud-based roles. Together, these modules offer a solid foundation and advanced competency in the evolving field of cloud computing.
