

Medical Anatomy and Physiology Capstone Certification

About this capstone

The **Medical Anatomy & Physiology** capstone is a comprehensive certification awarded upon successful completion of the following required exams. This structure validates a learner's knowledge of human body systems, medical terminology, and healthcare concepts—preparing them for advanced courses, health science programs, or entry-level healthcare pathways.

Required certifications

- [Medical Anatomy & Physiology](#)
- [Advanced Medical Anatomy & Physiology](#)

Capstone description

The Medical Anatomy & Physiology capstone assesses learners' understanding of body structures, functions, and medical concepts. The first exam covers intermediate anatomy, physiology, medical terminology, diseases, and ethics, providing a foundation for advanced studies in health science. The Advanced Medical Anatomy & Physiology exam builds on this by evaluating college-level knowledge of human anatomy and physiology, preparing learners for further healthcare training, advanced coursework, or careers in medical and allied health fields. Together, the certifications confirm comprehensive readiness for academic progression and entry into health science professions.
